

# HOME INSPECTION REPAIRS

Having worked with the real estate industry GT Signature knows that the sale of a home often hinges on making a home marketable or correcting issues identified in home inspection reports. These issues need to be addressed quickly and with quality work. We are aware of the urgency you and your client feels in getting those issues addressed now, not next week or worse next month. As a General Contractor, GT Signature can address any issue that may be identified. There is no charge for a bid and the process is simple. Just give us a copy of the inspection report and we will provide you a comprehensive bid set up a la carte style so that the current or new homeowner can pick and choose the items they would like addressed and the total cost to do so. That means varying issues can be scheduled in a cohesive manner and addressed as a whole. This saves you and your client valuable time and with little or no inconvenience.
